Career Objective

Enthusiastic engineering Graduate eager to gain hands-on experience in leading technologies. Looking forward to deepening my knowledge through practical experience in a dynamic company environment and applying new skills effectively to contribute to the team's success.

Skills

- **Programming Language:** Python , Java, SQL
- **Front-end Language:** HTML, CSS ,JavaScript
- **Database Management:** MYSQL
- **Packages:**NumPy,Pandas,Matplotlib, Seaborn , Selenium
- **Automation Testing:** Selenium WebDriver, XPath, CSS Selectors, WebDriverWait
- **Technologies:** Machine Learning , Artificial Intelligence
- **Tools:** PyCharm, VScode, Jupyter NoteBook,Intellij Idea
- **Communication:** English, Telugu, Hindi

Education

Sri Venkateswara Engineering College , Computer Science-DATA SCIENCE	2021 - 2025
• GPA: 8.2	
Sri Chaitanya JR Kalasala , Intermediate	2019 - 2021
• Percentage: 93.1	
Bhashyam High school	2018 - 2019
• GPA: 10	

Projects

Online Recruitment Fraud Detection using Deep Learning Approaches

- Designed to detect fraudulent job postings in online recruitment platforms using deep learning techniques.
- Deep Learning Models: LSTM (Long Short-Term Memory) and BERT (Bidirectional Encoder Representations from Transformers).
- Natural Language Processing (NLP) pipeline built using Transformers for automating the fraud detection process.
- Achieved an impressive 95 percentage accuracy in identifying fraudulent postings
- Practical application of transformer-based models for real-world classification problems.

ChatBot

NLP AND ML

- Developed a chatbot capable of simulating human-like conversations using Python.
- Designed to provide instant responses to user queries in a conversational format.
- High availability and real-time interaction.
- Enhances user engagement and brand image buy using AI.

Internship

Project Intern Black bucks (remote) (A deep learning approach to classifying Indian sign language gestures with diverse backgrounds)	3 Months
---	----------

- Using a deep learning model, Convolutional Neural Networks (CNN), to classify Indian Sign Language (ISL) gestures captured against varied and complex backgrounds, enabling accurate recognition despite

environmental variations.

- Collected and pre-processed gesture images to improve the model's robustness under different environmental conditions, including lighting, noise, and background variation.
- Used CNN algorithms to effectively recognize and classify gesture images, enhancing the accuracy of gesture interpretation in real-world scenarios.

Rooman Technologies(WFO)(AI DATA QUALITY ANALYST)

- Gained expertise in identifying, cleaning, and validating large datasets to ensure high-quality input for AI/ML models.
- Learned to use data profiling, labeling, and annotation tools to enhance dataset accuracy and consistency.
- Understood the impact of data quality on AI model performance and bias reduction.
- Developed skills in reviewing model outputs and feedback loops to continuously improve data integrity.

Certifications

- **Programming Essentials in Python** – Cisco Certification
- **Introduction to Web Development with HTML5, CSS3, and JavaScript**- edx
- **Cloud Computing** – NPTEL Certification
- **Short-Term Internship in Data Analytics from EXCELR-APSCHE**

Strengths

- Initiative-taking and enthusiastic
- Adaptability to unfamiliar environment
- Multilingual communicator
